EXPERIENCE

Full Stack Developer Intern
Business Web Solutions

📅 April 2024 – June 2024   📍 Bengaluru,India

- Completed training cum internship, covering a structured curriculum with hands-on experience in React.js and front-end development, completing 15+ tasks in 2 months.
- Developed and integrated 3+ dynamic components into live projects, showcasing practical expertise in React.js and state management.
- Participated in 5+ peer code reviews, improving code quality and gaining insights into industry best practices for maintainable development.
- Technologies Used: React Router, Context API, Redux, JavaScript, React.js, NodeJs.

TECHNICAL SKILLS

- Programming Languages: JavaScript, Core Java (Multithreading, Exception Handling, Regex, Collection), C++ (STL), HTML, CSS
- Frameworks & Libraries: Reactjs, React Router, React Redux, Restful API Node.js, Express.js, Bootstrap, Tailwind CSS, shadcnUI, Bootstrap
- Tools & Technologies : Git / GitHub, Redhat Linux, vsCode, Intellij, Vercel, PostMan, Zustand
- Databases: MySQL, MongoDB (Mongoose)

RELEVANT COURSEWORK

- Object Oriented Programming Language
- Computer Networks
- RedHat Linux
- Data Structures and Algorithms
- Database Management System

ACHIEVEMENTS

- Solved 250+ questions on LeetCode and GeeksforGeeks, enhancing problem-solving skills in Data Structures and Algorithms.
- Worked as a Subject Matter Expert at Chegg, solving 100+ questions on C++ programming and Computer Fundamentals.
- Content creator on YouTube with 300+ subscribers, producing educational content on Linux and coding tutorials.

CERTIFICATION

- Java Full Stack Development - JSpiders, Bangalore
- Data Structures - Bosscoder Academy
- Red Hat Linux - Red Hat
- Full Stack React Development - GeeksforGeeks (GFG)

EDUCATION

B.Tech. (CSE) - 8.17 CGPA
Lovely Professional University

📅 July 2019 – July 2023

Senior Secondary - 67%
Central Board of Secondary Education

📅 2019

Higher Secondary - 10 CGPA
Central Board of Secondary Education

📅 2016

PROJECTS

Job Listing & Application Platform - Sep 24

- Developed a job listing platform with advanced features like job posting, saving/unsaving jobs, application submissions, and real-time data updates.
- Optimized user experience with protected routes, user onboarding, and form validation using React Hook Form and Zod, ensuring seamless workflows.
- Technologies Used: ReactJS, Shadcn UI, Node.js, React Hook Form, Supabase, Clerk, Git.

Real-time Messaging App - Nov 24

- Designed and developed a real-time messaging application with one-on-one and group chat functionality using Socket.io for seamless communication.
- Implemented secure user authentication and authorization with JWT and Bcrypt, ensuring password security and safe user login flows.
- Technologies Used: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Bcrypt, REST APIs.

Full-Stack Blogging Platform - Dec 2024

- Developed a full-featured blogging website with user signup/signin, protected pages, and user-specific dashboards for personalized experiences.
- Integrated Appwrite as the backend to handle authentication, database interactions, and server-side features, ensuring scalability and seamless real-time updates.
- Technologies Used: React Router, Redux Toolkit, Appwrite, Node.js, Visual Editor, Image Upload, Cloud Storage.
